## FUNGICIDE

### "The Facts: A Two Step Approach"

**Fitness® Fungicide** is a proprietary propiconazole formulation that is designed specifically to provide broad spectrum disease control (both curative and preventative), minimize risk and enhance overall crop performance. Early application of Fitness Fungicide will help maximize the ability to have a healthy flag leaf. Flag leaf application will help maximize grain fill:

**Wheat:** 55% of grain fill is attributed to a healthy flag leaf

**Barley:** 65% of grain fill is attributed to a healthy flag leaf and penultimate leaf

#### PRODUCT FEATURES:

- Helps minimize crop disease
- Economical
- Low-use rate; easy to tank mix
- Maximum protection

#### PROPRIETARY ADJUVANT PACKAGE:

- Keeps the droplet in the liquid form on the leaf longer, increases penetration and systemic uptake of the active ingredient into the plant
- Speeds up drying of the fungus to prevent re-infection
- Acts as a catalyst to enhance performance of the fungicide

#### ACTIVE INGREDIENT:

Propiconazole

#### ADJUVANT RECOMMENDATION:

 at 0.25% v/v

#### Key Leaf Diseases Controlled

Barley Net Blotch, Barley Scald, Powdery Mildew, Leaf and Stem Rust, Septoria/Tan Spot (*see label for complete list*)

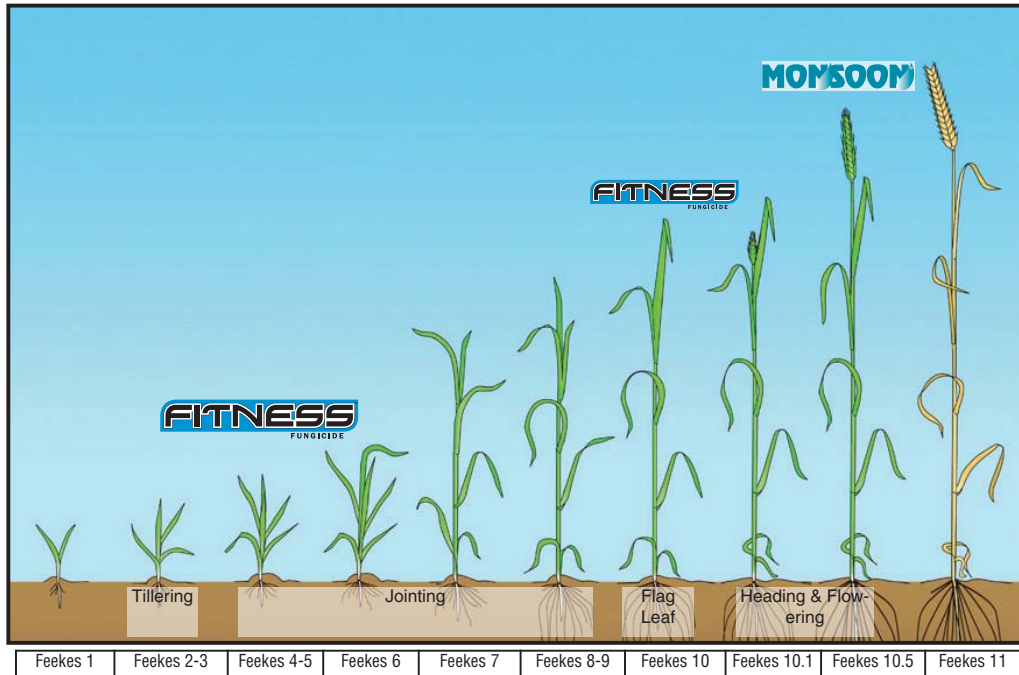

#### Application Guidelines\* Apply by ground or air

Rate & Timing: 2-4 oz/acre during herbicide sprays (Feeks 2-6)  
4 oz/acre at flag leaf timing (Feeks 10)  
Rainfast: 1 hour
