

Franchise®

Penetrant, Wetting Agent For use with Strobilurin Fungicides

For growers or custom applicators who want to minimize the variability in performance of strobilurin fungicides, **FRANCHISE™** was specially formulated for use when spraying fungicides on crops that are experiencing stress. Unlike traditional surfactants, **FRANCHISE** is specifically formulated for use with strobilurin chemistries.

Benefits

- Contributes to the consistency of strobilurin performance
- Provides enhanced uptake, spreading and coverage of sprays
- Proprietary formula which is particularly helpful if target plant is experiencing stress

Application Information

Can be applied aerial or ground

General Use Rates: 1 to 2 quarts/100 gallons spray mixture *OR*

Aerial: 1 to 2 ounces/acre

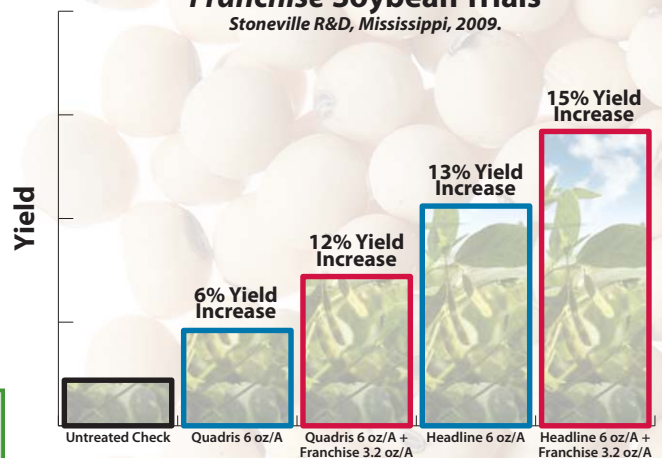

Ground: 3 to 4 ounces/acre

LECI-TECH provides
SUPERIOR PERFORMANCE by:

- ✓ Increasing Deposition (Coverage)
- ✓ Increasing Cuticle Penetration (Uptake)
- ✓ Reducing Drift

Franchise Soybean Trials
Stoneville R&D, Mississippi, 2009.
