

CHOICE[®]

Weather Master

Product Overview

Choice[®] Weather Master is a water conditioning agent for use with agricultural chemicals. Designed for hard water conditions, this liquid formulation locks up hard water cations allowing maximum herbicide performance. Compatible with all formulations of glyphosate, including the newer K-salts.

Features

Water Conditioner

Multiple Sequestering & Chelating agents

Liquid Formulation

Benefits

Reduces effects of hard water on herbicide performance

Bind multiple hard water cations, such as calcium, manganese, magnesium and potassium.

Convenience of treating 1000 gallons with 2½ to 5 gallons of liquid instead of 100 to 200 pounds of dry product.

ACTION OF CHOICE WEATHER MASTER IN HARD WATER

Hard water with cations

Addition of certain active ingredients actually "lock-on" to the cations.

The addition of CHOICE Weather Master results in it "locking-on" to the hard water cations. This prevents hard water cations from interfering with the herbicide performance.

● Hard water cations ● Active ingredient ● CHOICE Weather Master

Application Information

- **Suggested use rate:** 2 to 4 pints of **Choice Weather Master** per 100 gallons of water (based on water hardness)
- Fill spray tank ½ full of water and begin agitation
- Add desired rate of **Choice Weather Master** to water before adding pesticides
- Higher mineral content in water requires higher rates of **Choice Weather Master**.
