Product Overview:

Dyna-Shield[®] Metalaxyl is a proven seed-applied fungicide that offers seed protection against devastating diseases such as *Pythium*, seed rot and damping-off, systemic downy mildew, and early season *Phytophthora*. **Dyna-Shield Metalaxyl** provides seed protection, which helps produce healthier, more uniform stands. This product is applied at very low rates per acre, making it friendly to the grower, the seed and the environment.

Key Benefits

- Controls *Pythium*, seed rot and damping-off on cotton
- Controls *Pythium*, damping-off and early season *Phytophthora* on soybeans
- Controls *Pythium*, seed decay and damping-off on wheat, barley and oats
- Controls *Pythium*, damping-off and early season *Phytophthora* on alfalfa
- Controls *Pythium*, seed rot and damping-off on peanuts
- Controls *Pythium*, damping-off and systemic downy mildew on sorghum
- Controls systemic downy mildew on sunflowers
