Diuron Liquid (400 or 4L) Herbicide

Product Overview

Diuron can be utilized as a selective herbicide in certain crops or as a non-selective herbicide in non-cropland areas. **Diuron** has a broad weed spectrum with activity on many annual and perennial grasses as well as a host of broadleaf weeds.

Features

Application Flexibility	Can be Applied Pre or Post by Ground or Aerial Application
Residual Weed Control	Enables You to Spread Out Your Workload
Compatible with Many Herbicides	Fits Your Operation
Non-Corrosive	Easy on Application Equipment
Non-Volatile	Reduce Off-Target Concerns
Wide Crop Use Range	Labeled on Over 40 Crops
Broad Weed Spectrum	Great Foundation Herbicide
Wide Rate Range	Can be Used as a Selective or Non-Selective Herbicide

Benefits

Active Ingredients

Diuron: 3-(3,4-dichlorophenyl)-1,1-dimethylurea40.0%
Contains 4.0 pounds of Diuron per gallon

Application Information

Rate ranges are dependent on target weed(s) and whether it is a crop or non-cropland application.

Preemergence use in crops: 0.6 — 8.0 quarts/Acre

Cotton: 0.8 - 2.0 quarts/Acre, depending on soil type

Postemergence use in crops: *(Consult label)*

Non-Cropland: 4.0 - 12 quarts/Acre

Specific rate dependent on many factors (Consult label)
