

TAKE~~DOWN~~ SC

COTTON DEFOLIANT

Product Overview

TAKEDOWN SC® cotton defoliant is a must when looking for re-growth inhibition and superior defoliation. Utilizing **TAKEDOWN SC** in your defoliation tank mix offers less risk of trash in the modules, minimal "leaf stick", and an overall better leaf drop.

FEATURES

Regrowth inhibition

Timing of application

Flexible tank mix partner

BENEFITS

Removes juvenile growth and lessens the chance for sequential application

Works well in warm and humid weather conditions allowing harvest at maximum crop maturity

Can be tank mixed with other defoliants and boll openers such as Boll Buster®.

Labeled crops and use rates:

Cotton: Rates vary according to temperature, crop stage, and tank mix. See label for specific rate instructions.

Recommended Adjuvant:

The use of approved adjuvants have been shown to increase performance.
