

RiseR[®]

Soil Applied

RiseR[®] (7-17-3) is a low salt, seed safe, highly pure pop-up in-furrow starter fertilizer containing ACA[®] technology and micronutrients. These ingredients provide essential nutrients for optimizing seedling vigor, plant health and crop yields.

PRODUCT FEATURES:

- Excellent crop safety
- Low salt blend that's seed safe
- Increases early season plant vigor
- Increases root mass

Use Rates *(refer to label for more specific use rates)*

- 2 to 5 gallons per acre in furrow at planting
- Used for emergence and seedling vigor enhancement at 2 to 5 gallons per acre

RiseR allows more acres per fill than traditional row starters. The extremely seed safe formulation allows in-furrow injection, eliminating the need for expensive equipment that adds weight and causes trash problems in minimum-till. RiseR with micronutrients and ACA technology provides a compliment of nutrition development and roots that maximizes crop vigor and yield potential. **Research and grower corn trials have commonly shown yield results using RiseR that are 5 to 10 bushels per acre greater than the untreated.**
