

FULLBACK®

Foliar or Soil Applied

FULLBACK® (6% Magnesium Acetate) is a unique type of liquid magnesium that delivers significant benefits over other foliar and soil applied magnesium sources. Unlike other magnesium sources, **FULLBACK** has been designed to deliver maximum magnesium uptake with minimal potential for plant phototoxicity.

PRODUCT BENEFITS:

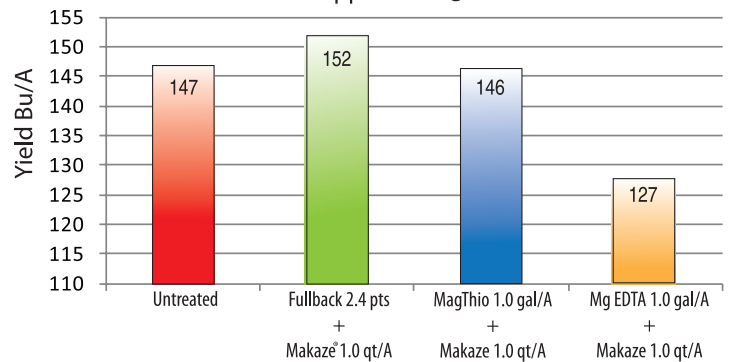

- Agronomically superior form of magnesium
- Superior foliar uptake and translocation within the plant
- Excellent crop safety

APPLICATION INFORMATION:

FULLBACK can be used on all agricultural, horticultural and ornamental crops to enhance plant development and correct magnesium deficiencies.

Corn

Application @ V6

Mild Deficiencies	Moderate Deficiencies	Severe Deficiencies
• 2.4 - 6 pints per acre	• 7.2 - 9.6 pints per acre	• 10 pints per acre
