

Product Overview

Weed Blast™ is a residual herbicide used to controls a wide range of annual and perennial weeds and grasses in non-crop land areas.

- Season-long weed control
- Dual-acting effectiveness
- Ready-to-use product
- Superior formulation
- Comes in two different packaging sizes: Shaker for spot treatment or bulk 40 lb. pail
- No mixing required
- Granular formulation eliminates herbicides drift

For **short-term control** of annual weeds on non--crop land areas such as roadsides, storage areas, and plant sites, apply 40 - 60 lbs., per acre.

For **extended control** of annuals and partial control of perennials such as bermudagrass and nutsedge, apply 100 to 200 lbs. per cre. Re-application as a spot treatment may be required when deep-rooted perennial weeds such as bermudagrass, bouncingbet, dogbane, johnsongrass, nutsedge and saltgrass are present.
