

# MAKAZE YIELD PRO

## "The Missing Link in Achieving Ultimate Yields in Roundup Ready® Crops"

MAKAZE YIELD PRO® is an enhanced MAKAZE® formulation with the ability to increase overall plant health and yield.

### PRODUCT FEATURES:

#### APPLICATION TIMING —

1st Application in Roundup Ready Crops

MAKAZE YIELD PRO has the ability to perform where other glyphosates fail:

- Hot, dry conditions
- Cooler nighttime temps

MAKAZE YIELD PRO works better on harder to control weeds such as:

- Lambsquarters
- Velvetleaf
- Giant ragweed

MAKAZE YIELD PRO has the quickest uptake of any glyphosate on the market

MAKAZE YIELD PRO contains two plant growth regulators

**ACTIVE INGREDIENTS:** Glyphosate + IBA + Kinetin

### ADJUVANT RECOMMENDATIONS:

1 pint/100 gallons if spray solution pH is above 7

Crop Areas	Application Timing	Expected Yield Increase
Sugarbeet	First glyphosate application — 30 days prior to harvest	1.33 tons/A

For best results apply Makaze Yield Pro early followed by a second application later in the season

### PRODUCT BENEFITS:

#### Improved delivery system:

- Quickest to the roots
- Rainfast
- Less drift
- Quicker, more complete kill

#### Confidence and proof of control

- No weather worries
- Works in tough conditions

#### Increases:

- Root formation/mass
- Nutrient uptake
- Plant vigor
- Water uptake
- Yield potential
