

Soil Applied

TITAN® PBA is an innovative fertilizer catalyst designed for use with standard fertility programs, significantly increasing fertilizer availability and overall plant performance. **TITAN PBA** is specifically formulated for impregnation on dry fertilizer, but can also be used in liquid starter and broadcast applications.

PRODUCT FEATURES

- Highly concentrated biochemistry.
- Excellent impregnation properties.
- Helps increase phosphorus, potassium and other nutrient availability.
- Superior early root development increases nutrient uptake and reduces nitrogen leaching.
- Helps to breakdown cornstalk residue.

APPLICATION INFORMATION:

- 2-4 quarts per ton on P & K blends
- 1-2 pints per acre with starters or sidedress
- 2-4 quarts per acre with broadcast applications
