Active Ingredients

- mancozeb

ROPER[®] DF Rainshield[™] is a preventative fungicide that offers excellent disease protection for many agricultural crops. Its unique Rainshield technology sticks the active ingredient to the leaf surface of the plant which helps eliminate wash-off from rainfall or irrigation.

Rainshield is a trademark of Dow Agrosciences, LLC.

Product Benefits:

- Superior disease control performance
- Excellent rainfastness
- Improved leaf coverage
- Ease of tank mixing
- Less dust
- Better dispersion in the spray tank
- Less spray tank residue
