FRANCHISE® is specifically formulated for use with strobilurin chemistries to minimize variability in performance. Unlike traditional surfactants, FRANCHISE has been shown to help keep corn foliage greener further into the season when tankmixed with a fungicide.

Product Benefits:

- TO: Drift reduction with performance-sized droplets
- ON: Droplet retention by adhesion and spreading
- IN: Increased penetration without cuticle disruption
- Contributes to strobilurin fungicide performance and minimizes variability

Active Ingredients

- Contains Leci-Tech technology
