

Active Ingredients

- IBA (Indole-3-butyric acid)
- Salicylic acid
- Chitosan

CONSENSUS® is an innovative seed treatment containing EPA-approved Plant Growth Regulator technology designed to promote early germination, quicker root development and stimulation of Systemic Acquired Resistance (SAR) stress resistance. Triple-charged to **Prime, Propel and Protect**.

Product Benefits:

- PRIMES seed for faster germination
- PROPELS a bigger seedling root system
- PROTECTS by activating the plant's natural defense mechanisms
- Unique combination of EPA-registered plant growth regulators
- Highly efficient, low-volume formulation
- Compatible with many seed treatments
