SNIPER LFR is an insecticide applied at planting, providing a zone of protection that controls pests before seed or seedling damage ever takes place. SNIPER LFR (Liquid Fertilizer Ready technology) has excellent liquid starter fertilizer compatibility enabling an efficient one trip through the field. One pass to the plant, fertilizer and protect the seed for a healthier plant stand leading to an increase in yield potential.

Product Benefits:

- Controls seed and seedling pests such as wireworm, cutworm, grubs, rootworm, armyworm, seedcorn maggot and common stalk borer
- Has a long residual to protect the roots and seed
- Excellent liquid fertilizer compatibility and mixing properties

Active Ingredients

- bifenthrin
