

AURA T+V is a biopesticide product for management of common diseases including powdery mildew, shot hole and brown rot blossom blight*. AURA T+V triggers a unique **Multi-Potent Response™ (MPR)**, activating a plant's natural defense systems to provide additional long-lasting protection against diseases. AURA T+V enhances yield and improves overall plant performance in tree nuts*, tree fruit*, and grapes.

MULTI-POTENT RESPONSE (MPR):

- AURA T+V activates plant defense responses to restrict the growth of pathogens, leading to an increase in yield while maintaining quality
 - Production of antimicrobial enzymes and molecules
 - Strengthening of cell wall structure
 - Upregulation of plant defense genes and hormones

GROWER BENEFITS

- Targeted disease control to enhance quality and yield
- Unique mode of action for resistance management
- No maximum residue levels (MRL) or contribution to MRL considerations for marketing
- Excellent safety profile with low toxicity to pollinators, wildlife, and applicators

RATES

Bearing tree fruit*, tree nut* and grape application rates start at 12.8 fl. oz./100 gal carrier volume

- Review label for specific requirements and non-bearing tree fruit* and tree nut* rates.
