

AURA 360 is a biopesticide product for management of several common diseases in a number of specialty crops, including powdery mildew, downy mildew, and early blight\*. AURA 360 triggers a unique Multi-Potent Response™ (MPR), activating a plant's natural defense systems to provide additional long-lasting protection against diseases. AURA 360 enhances yield and improves overall plant performance in a variety of specialty crops.

MULTI-POTENT RESPONSE (MPR):

- AURA 360 activates plant defense responses to restrict the growth of pathogens, leading to an increase in yield while maintaining quality
- Production of antimicrobial enzymes and molecules
- Strengthening of cell wall structure
- Upregulation of plant defense genes and hormones

GROWER BENEFITS

- Targeted disease control for enhanced quality and yield
- Unique mode of action for resistance management
- No maximum residue levels (MRL) or contribution to MRL considerations for marketing
- Excellent safety profile with low toxicity to pollinators, wildlife, and applicators

RATES

- 4-6 fl. oz./A
- Minimum application volume 10 gal/A
- Review label for specific requirements
