

BROMAC®

BROMOXYNIL	GROUP	6	HERBICIDE
MCPA	GROUP	4	HERBICIDE

BROMAC® is a selective post-emergence herbicide for control of important broadleaf weeds infesting small grains (wheat, barley, oats, rye), and grass grown for seed and flax. Optimum control is achieved when BROMAC is applied to actively growing weed seedlings.

PRODUCT FEATURES

- Offers two modes of action from mix of active ingredients
- Convenient application options
- Labeled for use in wheat, barley, oats, and rye

RATES

See label for specific use rates.

GROWER BENEFITS

- Offers control in 50+ weed species including lamb's quarters, waterhemp, ragweed, and kochia
- Can be tank mixed with a variety of herbicides and insecticides
