

INVERTID® 2F

METHOXYFENOZIDE | GROUP 18 | INSECTICIDE

INVERTID 2F® is a **LECI-TECH®** enhanced insecticide that controls a broad range of chewing lepidopterous larvae while not disrupting beneficial insects and pollinators. LECI-TECH Technology provides superior penetration into the leaf surface and greater uptake of the insecticide for more efficient activity on pests.

WITH LECI-TECH TECHNOLOGY

To the plant:
Drift reduction with performance-sized droplets

On the plant:
Droplet retention by adhesion and spreading

In the plant:
Increased penetration without cuticle disruption

PRODUCT FEATURES

- Unique group 18 mode of action
- Ideal tool for Integrated Pest Management (IPM) programs
- Can be used on a broad range of crops

GROWER BENEFITS

- Mimics the molting hormone in lepidopteras causing a premature molt and a quick halt of feeding
- Fights pyrethroid resistance and allows beneficial insects and pollinators to go unimpeded
- Increases AI absorption with better leaf coverage
- Labeled for tree nuts, citrus, vegetables, and many other crops

RATES

4-24 fl. oz./A (depending on crop and targeted pest)
