

FLUMIOXAZIN	GROUP	14	HERBICIDE
-------------	-------	----	-----------

The active ingredient flumioxazin has proven to be a great tool for the residual control and suppression of over 70 weed species. The crop safety and reliability of **VALKOS** products can be used in 35+ crops and crop groups for controlling the hardest-to-kill and resistant weeds. VALKOS products consistently show four-six weeks of residual control when applied at labeled rates.
