Active Ingredients

- organosilicone surfactant
- methylated esters of fatty acids

PHASE is a high performance proprietary formula that provides spreading and coverage of a non-ionic surfactant and the penetration of a methylated seed oil.

Product Benefits:

- Combined spreading ability of organosilicone surfactant with penetrating ability of a methylated seed oil makes PHASE an ideal tank mix partner for a wide variety of pesticides
- Methylated seed and crop oil performance with non-ionic adjuvant use rates
- Rapidly spreads across and penetrates plant tissue carrying sensitive pesticides into the plant cuticle protecting them from UV breakdown
- Can be used with a variety of insecticides, herbicides and fungicides
