Active Ingredients

- Synthetic latex
- Silicone polyether copolymer

TACTIC combines the spreading properties of an organosilicone surfactant with a quality sticker for the best possible droplet retention on the leaf surface. TACTIC sticks insecticides and fungicides to the leaf surface preventing pesticide loss due to droplet shatter or bounce, and protects from rain and irrigation wash-off.

Product Benefits:

- TACTIC produces excellent droplet deposition and rainfastness in minutes
- TACTIC weather-proofs your spray application
- Works in high or low volume sprays in ground or aerial applications
- Covers the leaf surface with the spreading ability of an organosilicone
- Increases the effectiveness of insecticides and fungicides
