Active Ingredients

- cyfluthrin
- helios technology

TOMBSTONE™ HELIOS® is an enhanced synthetic pyrethroid (cyfluthrin) with extended performance over many other insecticides. HELIOS is a unique technology that protects the active ingredient by providing the ultimate protection from UV exposure, extending performance in the field.

Tombstone Helios is a restricted use pesticide.

Product Benefits:

- Extended residual technology
- Excellent knockdown
- Compatible with nutritionals and POST herbicides
- Labeled on over 50 crops
