

Mess with the bull...Get the horns.

MATADOR® is a soybean pre-emerge herbicide chemistry that contains three different active ingredients - metolachlor, metribuzin and imazethapyr - to help control grass and broadleaf weeds. This unique formulation was designed to be a resistant weed management tool to combat glyphosate and ALS resistant weeds.

Product Benefits:

- Unique formulation - 3 active ingredients in 1 bottle
- Burndown activity and long-lasting residual
- Controls over 20 grass and 50 broadleaf weeds
- No tank mixes needed for residual control

Active Ingredients

- metolachlor
- metribuzin
- imazethapyr
