A unique blend of urea-triazone and potassium thiosulfate. It is a chlorine-free, clear solution containing 15% nitrogen (40% of which is slow release nitrogen (SRN) in the patented Triazone compound), 12% potassium and 8% sulfur in the potassium thiosulfate (KTS) form. The clearly superior fertilizer solution.

**Product Benefits:**

- Increased crop safety
- Increased nitrogen absorption
- Increased translocation
- Increased nutrient remobilization
