Active Ingredients

Borosol® 10 • boron

BOROSOL 10 is a patented soluble polyborate liquid for the prevention and correction of boron deficiencies in crops. The flexibility of BOROSOL 10 allows it to be mixed with other liquid fertilizers for foliar or soil applications.

Product Benefits:

- Agronomically superior: plants take up the boron more rapidly and more completely
- Convenient liquid formulation easy to handle, measure and apply
- Flexible and compatible; mixes well with most plant growth regulators, insecticides and herbicides
- BOROSOL 10 has a pH of 8.0
