

REBAR[®] 3

www.lovelandproducts.com

REBAR[®] 3 (3% Iron) is a combination of ortho-ortho EDDHSA and EDDHA chelated liquid iron designed to be readily available to crops across a wide range of soil conditions. REBAR 3 is the only source of iron with two forms of chelated iron to extend availability in severe alkaline soils and works to address iron chlorosis issues in affected crops.

Product Benefits:

- Two sources of ortho-ortho chelated iron
- Addresses iron chlorosis issues at a critical stage
- Highly compatible liquid formulation
- Dual source iron extends release curve and uptake of iron
- Designed for in-furrow and banded applications
- Convenient application rates fit many acre solutions
