

BLACKMAX[®] 22

www.lovelandproducts.com

BLACKMAX[®] 22 is a nutritional enhancement tool designed to positively impact nutrient availability and soil attributes. When combined with a grower's fertilizer program the Linear Humus Components (LHC) in BlackMax 22 can give growers more nutrition for their crops and provide a better soil environment in which to grow - a more sustainable approach to plant nutrition.

Product Benefits:

- LHC technology to enhance applied nutrient availability and uptake
- Enhanced existing nutrient mineralization and nutrient solubility
- Designed to promote beneficial microbes
- Sound, Efficient, Flexible Formulation

"IT CONSISTENTLY PUTS MORE MONEY IN MY POCKET."

BLACKMAX[®] 22

If you feed it, you need it!

BENEFITS:

- LHC technology to enhance applied nutrient availability and uptake
- Enhanced existing nutrient mineralization and nutrient solubility
- Promote beneficial microbes
- Sound, efficient, flexible formulation

What is LHC Technology?

Linear Humus Component Technology (LHC) utilizes the benefits of a spectrum of humic substances to address nutrient availability and soil environmental limitations creating an enhanced approach to plant nutrition.

MORE FOR THE PLANT

- Increased nutrient mineralization and solubility
- Better nutrient uptake promotes root mass
- Reduced root burn through complexing fertilizer salts
- Optimized water holding capacity *

BETTER FOR THE SOIL

- Enhanced CEC in application zone
- Supports beneficial microbes
- Promotes buffering of saline/sodic conditions
- Positively impacts soil structure *

LESS ENVIRONMENTAL IMPACT

- Better access to existing nutrition
- Sustainable approach to soil till
- Optimize land use through productivity
- Natural petroleum-free product

What is LHC Technology?

Linear Humus Component Technology utilizes the benefits of a spectrum of humic substances to address nutrient availability and soil environmental limitations creating an enhanced approach to plant nutrition.
