NutriSync® Micro Pak (13-0-1 with micros) is powered by “*proprietary nutrient transport technology*” and contains key plant major and micronutrients. NutriSync technology has been shown to improve nutrient assimilation, mobilization and utilization - critical to promote nutrient transport to areas of vigorous growth providing better utilization of nutrients to fulfill plant demands.

NutriSync technology is designed to carry mineral nutrients and organic compounds like auxin, amino acids and lipids, to areas of high demand to support plant growth and development.

Product Benefits:

- Enhances nutrient uptake and mobilization
- Greater micronutrient utilization
- Promotes healthier plants, more consistent quality and higher yield potential
- Contains highly available zinc, manganese, copper and iron for balanced foliar nutrition
- Wide window of application timing and performance
