

Product Testimonials

- "AWAKEN COFLOW treating has started...and the finished product looks WONDERFUL!"

David Doonan, Nutrien Ag Solutions Central Corn Belt Seed Manager

- "Working well and the finished product looks GREAT! You wouldn't believe the difference on dust-off!"

Andy Fleisher, Loveland Products PPM

The smarter seed treatment, Awaken CoFlow® helps with early field corn growth, seed placement dust-off, and maximizes your chance for higher yields.

Awaken CoFlow is a nutritional corn seed treatment, combined with a seed treatment polymer coating that's been designed specifically for field corn.

A multi-functional corn fertilizer, **Awaken CoFlow** is meant to help growers enjoy better early growth and gain a positive return on investment. Also, this smarter seed treatment contains a polymer coating aimed to increase seed flowability and decrease seed treatment dust-off.

Product Benefits:

While your results may vary, growers in more than 50 field trials have reported an average increase of seven bushels per acre, with a positive ROI in 87% of the field trials. Using **Awaken CoFlow** on your field corn may:

- Stimulate early corn growth by providing essential micronutrients and extracting nutrients from the soil
- Increase flowability after planting corn seeds
- Improve corn seed spacing and offer precision placement
- Decrease dust-off, resulting in pollinator safety and good seed treatment stewardship
- Result in better than average early growth

How Awaken CoFlow Works

Awaken CoFlow is a nutritional corn fertilizer package that includes a complexed micronutrient package of seven nutritional ingredients, including: nitrogen, boron, copper, iron, manganese, molybdenum and zinc. All seven helpful ingredients are wrapped in a polymer coating used specifically for field corn in order to limit dust-off, while helping with precise corn seed spacing and flowability.
