Active Ingredients

- azoxystrobin
- trifloxystrobin
- prothioconazole

MAGISTRATE® is a mix of azoxystrobin, trifloxystrobin and prothioconazole. The multiple active ingredients control a wide range of foliar disease and offer an excellent resistance management tool.

Product Benefits:

- A unique mix of three active ingredients offering two modes of action delivers a broad spectrum disease control through preventative and curative activity
- Two strobilurins with distinct activity inside the plant offer systemic and translaminar movement while also providing long-lasting disease control
- Lengthens photosynthesis for improved plant growth, increasing grain and pod fill
