PRE-Tector PLUS EC
Herbicide

Active Ingredients

- Imazethapyr
- Pendimethalin

PRE-TECTOR® PLUS EC is a soybean pre-emerge herbicide that combines Imazethapyr and Pendimethalin to offer residual and contact weed control through two modes of action.

Product Benefits:

- Two active ingredients provide different site of action herbicides in one convenient formulation
- Contact + residual weed control
- Controls multiple broadleaf weeds and grasses
- Effective in all tillage conditions
