

Biocatalyst Technology

EXTRACT

Powered by ACCOMPLISH® is a proprietary blend of ACCOMPLISH LM and ammonium thiosulfate, specifically formulated to help growers manage crop residue. The ammonium thiosulfate provides native microbes the nutrients they need to break down crop residue so that bound nutrients become available for the next crop, while ACCOMPLISH LM improves nutrient availability and soil microbial diversity.

Product Benefits:

- Maximizes nutrient release from crop residues and the soil
- Extends existing nutrient availability later into the season
- Promotes more even crop emergence
- Optimizes yield potential for the next crop
