Active Ingredients

- Mesotrione 40%

CARABINER™ 4 SC is a selective herbicide and is an excellent tank mix options that provides both contact and residual control of broadleaf weeds. The flexible application window of CARABINER™ 4 SC provides an effective tool for managing some of the toughest weeds, including pigweed, kochia, velvet leaf, sunflower and nightshade species. The active ingredient Mesotrione in CARABINER™ 4 SC has shown excellent crop safety in corn for both pre- and post-emergent applications.

Product Benefits:

- Delivers both contact and residual control of broadleaf weeds
- Excellent tank mix option for resistance-management herbicide strategies
- Flexible application timing
- Exceptional crop safety when applied pre- or post-emergent
