**OXELID™
4F**

Active Ingredients

- Fluazinam 40%

OXELID™ 4F is an excellent option for controlling molds and blights that attack legume vegetables, bean, peanut, potato and onion crops. The multi-site mode of action in the active ingredient Fluazinam helps prevent future resistance against OXELID™ 4F. It also delivers a flexible application method and low use rate.

Product Benefits:

- Effective for controlling molds and blights
- Low risk of resistance development due to its multi-site mode of action
- Great fit for a fungicide rotational IPM strategy
