

Going Beneath the Surface!

Riser
7-17-3
F/A 

or **Prospect**[®]
6-0-1

program

- Contains a complete micronutrient package
- Promotes early plant growth and vigor
- Creates a more fibrous and extensive root system which helps increase stress tolerance
- **Powered by ACA[®] Technology**
 - Contains Zinc Ammonium Acetate (mother nature's natural mining agent)
 - Promotes root expansion and improved nutrient and water uptake
- **Riser[®] FA contains organic acids to increase soil CEC and improved nutrient uptake**
 - Converts plant's energy to use when peak growth is needed

PLUS

Radiate[®]
PLANT GROWTH HORMONE

- Increases root mass
- Increases plant vigor
- Reduces early season stress

Use Rates and Application Timing

Turf:

Riser FA / Prospect[®]: 1-2 qts/acre or 1-1.5 oz/ 1,000 sq ft

Radiate[®]: 11 oz per acre with 2 gals of water/1,000 sq ft

Timing: Any time of the year when root enhancement is needed.

Apply **Riser FA or Prospect with Radiate** a minimum of two applications, 10-14 days apart to promote the initiation and enhancement of plant rooting. Monthly applications are recommended to maintain strong root mass, reducing the effects of stress and or poor soil quality.

Landscape:

Riser FA / Prospect: 1-2 qts/100 gals of water per acre

Radiate: 8.5 oz/100 gallons of water on plants less than 2 years old; 13 oz/1000 gallons of water on plants more than 2 years old.

Timing: Apply every 10-14 days as often as needed.

Greenhouse/Nursery:

Riser FA / Prospect: 1.5-2.5 qts per acre or 1-2.2 oz/1,000 sq ft

Radiate: 8.5 oz/100 gals of water on plants less than 2 years old; 13 oz/1000 gals of water on plants more than 2 years old.

Timing: Apply every 10-14 day intervals, 1-2 weeks prior to sell.

Cuttings: Soft wood 5 oz/100 gals of water

Medium wood: 10 oz/100 gals of water

Hard wood: 15 oz/100 gals of water

Reduce transplant shock (Roses, Geraniums, flowering shrubs & flowering plants): 20 tbs/100 gals of water.

Annual and perennial flowering plants: 10 tbs/100 gals of water.
