

ACCOMPLISH LM is an innovative fertilizer catalyst designed to significantly increase fertilizer availability and overall plant health. Offers concentrated biochemistry in easy-to-handle liquid form. Formulated for broadcast and starter fertilizer applications.

FEATURES:

- Powered by Fertilizer Biocatalyst Technology
- Compatible with most fertilizers, herbicides, fungicides, and insecticides
- Consistent performance across crop and soil types

RATES:

Apply 1-2 pts/A with starters; 1-2 qts/A broadcast with UAN and other liquid fertilizers; 2-3 qrts/A with manures or poultry litter

GROWER BENEFITS:

- Improves nutrient availability and uptake
- Enhances nutrient use efficiency
- Promotes better root growth and development
- Designed to enhance applied fertilizer applications
