

ENDURANCE™

Endurance™ is designed to impact yield and quality in specialty crops by positively impacting fruit set and fruit retention. Applying Endurance during early reproductive periods in permanent crops increases photosynthesis and helps a crop overcome situations that result in early fruit abortion. Years of trial work has shown that Endurance positively impacts yield and quality in many specialty and permanent crops.

GROWER BENEFITS:

- Helps the crop set more fruit during early reproductive stages
- Promotes retention of fruit and take advantage of an aggressive fertility program
- Increases photosynthesis for a more vigorous crop that can overcome the stresses of the season
- Decreases the impact of stress on the crop by down regulating the stress response

RATES:

0.5% v/v in a volume of water to provide adequate coverage

FEATURES:

- Formulated with an optimized ratio of amino acid and plant growth regulator to drive both photosynthesis and metabolic activity particularly in times of stress
- Compatible with many fertilizers and herbicide tankmix partners
- Designed specifically to support the growing patterns of specialty crops like tree fruits and nuts

ACTIVE INGREDIENTS:

GABA (Gaba Amino Butyric Acid) and Choline Chloride

ADJUVANT RECOMMENDATION:

ALWAYS READ AND FOLLOW LABEL DIRECTIONS.
