

EXTRACT Powered by **Accomplish™** is a Loveland Products proprietary blend of proven fertilizer biocatalyst — **ACCOMPLISH®** LM and a nitrogen source, designed to help growers not only manage crop residue but also easily and effectively optimize the release of nutrients from residue and those in the soil.

FEATURES:

- Labeled for pre-emerge and residue management applications
- Can be tank mixed with herbicides for fall or spring burndown
- Compatible with liquid fertilizers for spring broadcast

GROWER BENEFITS:

- Promote release of nutrients trapped in residue or bound in soil
- Extend existing nutrient availability later into the season
- Optimize plantability in the spring
- More even crop emergence
- Improve yield potential

RATES:

1-2 gals/A

ANALYSIS:
