

NutriSync Calcium

NUTRISYNC® CALCIUM (4-0-0 10% Ca) is a unique liquid foliar nutritional that enhances the physiological activity and growth of crops that demand calcium. Powered by NutriSync enhanced micronutrient technology – NutriSync Calcium helps plants more efficiently mobilize and utilize applied nutrients as well as those that are already within the plant, enhancing crop growth throughout the season. NutriSync Calcium contains proprietary Nutrient Transport Technology combined with a readily plant available form of calcium.

FEATURES:

- Built with NutriSync Nutrient Transport Technology
- Optimized for the needs of calcium critical crops
- Wide window of application timing and performance

GROWER BENEFITS:

- Optimized for the needs of crops demanding highly available and mobile calcium for yield and quality
- Promotes cell development, integrity and enzyme regulation
- Enhances overall nutrient uptake and mobilization

RATES:

Row Crops: 1-4 qts/A; Specialty Crops: 4-16 pts/A
