

High Performance Adjuvant Recommendation

XtendiMax® herbicide with VaporGrip® Technology is designed to be the industry's lowest volatility dicamba formulation. It is an ideal dicamba option to help manage glyphosate-resistant and tough-to-control weeds.

The addition of Strike Force® plus Reign® offers enhanced performance and the flexibility to tank mix any additional products that have been approved. Flexibility is critical to operate efficiently, apply product legally, and position the right agronomic program specific to each farm.

XtendiMax Approved Tank Mix Options

Approved DRA	Reign		
Adjuvants	Activator 90*	Insecticides	Acephate 90 WDG
	Choice Trio		Invertid 2F*
	Compadre*		Wrangler
	Comp-Aide	Plant Nutrition	Accomplish LM
	Freeway*		Awaken 3D
	Liberate*		Blackmax 22*
	MSO Concentrate with Leci-Tech*		Lokomotive
	Reign		Maximum N-Pact
	Scanner		Maximum N-Pact B*
	Spreader 90*		Maximum N-Pact K
	Strike Force*		N-Pact
	NutriSync 3D		
	NutriSync Boron		
Herbicides	Diuron 4L	Plant Growth Regulators	Task Force 3D
	Intensity Post-Emergence Grass Herbicide*		Mepiquat
	Intensity One*		Radiate*
	Intimidator*	Leci-Tech TO ON IN	Potenza
	Mad Dog K6* (Max use rate of 32 oz/A for each application)		TO: To the plant with performance-sized droplets
	Matador*		ON: Droplet retention by adhesion and spreading
	Matador-S*		IN: Increased penetration without cuticle disruption
	Metribuzin 75		Defoamer stops and eliminates foam buildup
	Mongoose*		Water conditioning without AMS
	Stealth*		
Trifluralin HF*			

+ For preplant applications on non-dicamba-treated crops. General Label requires a 28-day window for soybeans and a 21-day window for cotton between application and planting.

* Use with Approved DRA such as Reign Reference Only (current as of 4/19). As always, please read and follow labeled directions for specific products being used. Use approved tank mix products and DRA found at www.xtendimaxapplicationrequirements.com
